

New Worker Health Checks Program

Merri Community Health Services Ltd. is now an endorsed provider of workplace-based Worker Health Checks in the North and West metropolitan region.

WorkSafe Victoria is rolling out a new program to improve health and productivity in the workplace by offering free health checks to Victoria's 2.6 million workers. The program gives workers a free, voluntary, and confidential Worker Health Check at their place of work. The Worker Health Check offers workers information and advice about their risk of chronic diseases, and the potential impact of the worker's lifestyle on their health.

Victorians are becoming increasingly susceptible to otherwise preventable chronic diseases. Early intervention can make an enormous difference to personal health and productivity in the workplace.

Our business is health and we care about our community, which is why we've been endorsed by WorkSafe to carry out these convenient and confidential health checks. We'll also provide advice on the risk of chronic disease and the impact that your worker's lifestyles may have on their health.

The program will facilitate access to a range of lifestyle intervention programs for workers found (as a result of their Check) to be at high risk of developing a chronic disease.
